Subject: FW: Inquiry from Andrea Cook at the Rapid City Journal re Powertech UIC permits

The scope is a little wider than I thought. I am guessing she is asking about the proposed Part 192 update rather than the Part 61 Subpart W update. I have attached the fact sheet for that proposed rule. It hasn't actually been published in the Federal Register yet as far as I could see, so the clock has not started.

I will start putting together the talking points.

Subject: Powertech permit

Valois: As promised in my voice mail, here's my follow up email. I spoke with Dania Zinner this morning and she indicated that you could give me an update on the status of Azarga (Powertech) Uranium's permit application with EPA. I also have a question for you about the new proposed rules, a timeline for those rules and the impact that could have on the Dewey-Burdock permitting process.

I will be out of the office until at least 2 p.m. today, but should be back shortly after. Any information you can give me will be appreciated.

Thank you,

Andrea J. Cook
